

The background image is a photograph of an old, neglected interior. It shows a wooden staircase with a dark railing leading up to a doorway. The walls are covered in peeling white paint, and the floor at the bottom is a checkered tile. A wooden ladder leans against the wall near the doorway. The lighting is bright from the doorway, creating a strong contrast with the dark interior.

# Life, Learning and **SUSTAINABILITY**

By: *ashley Grace Martel*

# *problem* Statement

---

In what way can architects instill a sense of sentiment towards sustainability in future generations?

## claim

A design that successfully and economically utilizes a site's resources and engages a community can evoke a sense of sustainability for generations.
